

## **World Environment Day: Driving Sustainable Change**

*On June 5, 2025*

On World Environment Day 2025, the School of Public Health led impactful sustainability initiatives, including awareness on micro- and nanoplastics, reducing single-use plastics, and launching a student-led e-waste collection hub in collaboration with Eco Friends Ltd.

Aligned with global sustainability goals, these efforts promoted environmental responsibility, reduced pollution, and encouraged a culture of long-term stewardship and community participation on campus.

The School of Public Health inaugurated a permanent e-waste collection point at the Centre of Excellence, promoting responsible and accessible e-waste disposal on campus. The facility will be operational on the 5th of every month from 8 a.m. to 6 p.m.

Dedicated to the memory of Pushpalatata D. Patil, the initiative encourages the campus community to actively participate in environmental sustainability and responsible waste management.

Step 1: Register your Waste at the Center

Step 2: Weigh the E-Waste

Step 3: Deposit your waste at the collection box

Step 4: EcoTech collects the waste from the center
